

X-AIRCONTROL

EFFICIENT ROOM CONTROL WITH X-AIRCONTROL

Looking for perfect indoor air management that fulfils individual requirements on energy efficiency, comfort levels, acoustic properties and air quality?

Look no further. X-AIRCONTROL is efficient, demand-based, and super flexible.

ADVANTAGES

- Individual room control
- Optimisation of the air handling unit based on ventilation and air conditioning parameters
 - Fan speed control based on the damper blade position of VAV terminal units
 - Control of the recirculation damper based on the air quality

- Centralised air conditioning (heating/cooling) based on actual room temperatures
- Centralised alarm management and display of actual operating values
- Cost optimisation due to reduced number of data points
- Easy commissioning
