

LEV

□

- Available in two lengths
- Dimensions up to and incl. 630

LEV is a circular sound attenuator for use in ductwork.

Design

LEV is a circular steel unit lined with attenuation material inside. Available in both 500 mm and 1000 mm lengths. LEV complies air tightness class C.

Materials and surface coating

LEV is made of galvanised steel with mineral wool and a glass fibre layer as attenuation material. Connection collars are fitted with EPDM rubber gaskets.
