

## INTER

- Universal kit for extract air terminal devices
- For easy valve installation in ceiling plate

### APPLICATION □

---

Inter is used to simplify the installation of valves in lightweight ceilings (mineral wool).

### DESCRIPTION □

---

#### **Materials and surfaces**

Inter is produced in galvanised steel.

### INSTALLATION □

---

Cut a groove in the ceiling plate (1)  $D1 + 5$  mm, using the end-piece of the Inter as a template. Install the Inter (2) in the ceiling plate (1) by using 3 self-drilling screws inside the Inter to attach the mounting frame for the valve (3). Then fit the valve in the mounting frame. Finally, install the assembled ceiling plate in a modular ceiling system. Use of connection nipple (4) or bend between Inter and Spiro duct (5) is recommended.
