

USI

- Large capacity
- Available with integrated sound attenuator
- Cleanable
- Easy installation - ideal for renovation work
- Suitable for schools and large premises
- Dimensions from Ø200 - Ø500

APPLICATION □

The USI extract air terminal is intended for open installation. It is suitable for high air flow rates, and can thus be used as a central extraction unit in large rooms - ideal in combination with VAV.

Design

The valve is available with and without integrated sound attenuator.

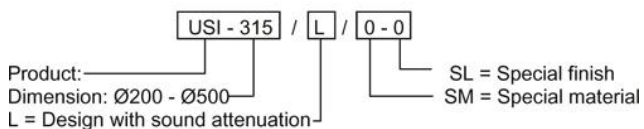

DESCRIPTION □

Materials and surfaces

The device is made of galvanised steel, and comes in RAL 9003 - gloss 30. Other colours are available on request.
