

TOG

- Installation friendly
- Easy cleaning

Application

TOG-R is a circular transfer unit for wall mounting, and is used for inter-room air transfer, such as from living room to corridor, using a central outlet.

Design

TOG-R comprises two mounting rings and two sound attenuating diffuser fronts which are installed on each side of the wall. The mounting rings feature a clip-on system for easy fitting of the front units.

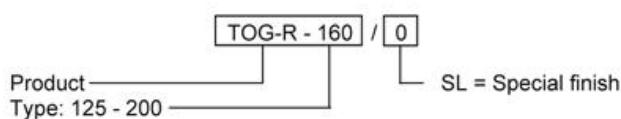

Description

Materials and surfaces

Both the diffuser front and the mounting ring are made in steel, with a RAL 9003 - gloss finish. Other colours available on request.

TEKNISK INFORMATION

ORDER CODE, TOG-R

Example:

TOG-R-160 / 0
